**Why is there a surcharge?**  
The below surcharge corresponds with venue surcharge dates to enable a smooth build. This surcharge rate is incurred from the venue / venue electrical contractors which we need to pass on to all organisers and exhibitors irrespective of when their stand space was booked.

Please supply and install the following items on hire

Any order cancelled paid or unpaid after the standard and surcharge date will have a maximum 50% credit (see T&Cs)

Description	Standard Rate on orders received between 27/09/2024 to 06/10/2024	Surcharge Rate on orders received From 07/10/2024 and onsite	Quantity	Total Cost
<b>Fittings -Select quantity and type of fittings required then add up the amps and order the relevant mains power above</b>

**Multigang / Extension leads** Taken from E-Guide Regulations Page 42

- Multi-way plug in type and bayonet adapters shall not be used.
- The use of trailing/Block type 4-way fused sockets shall be restricted to the following: one 4-way lead per fixed socket outlet, subject to a maximum loading of 500 watts total and its plug shall be fused accordingly.
- A maximum flexible cord length of 2 metres from plug to trailing block unit.

**Portable appliance testing** Taken from E-Guide Regulations Page 37

- It is the owner or user's responsibility to ensure that portable appliances are safe to be plugged into the electrical system.

**The Use of battery power** Taken from E-guide Regulations Page 46

The use of batteries to provide mains stand power is strictly prohibited, as batteries are not currently considered to be a safe source of power. This is primarily due to the concern of being unable to identify power sources clearly within a stand and therefore to isolate power in case of a fire, as well as concerns over defects due to lack of maintenance and poor transportation and storage.

**Venue switch and Mains cables**

A Venue Mains cable is installed to every island stand or within a Block of stands. Showlite will order the mains on behalf of the exhibitor / stand contractor to a position based on information received at that specific time.

It is the responsibility of the exhibitor/stand contractor to incorporate the venue main switch and mains cable into their stand design. If the venue has ducting and you have a duct running through your stand there is a possibility a venue mains cable will come out of venue ducting and a main switch installed on your stand.

We do not have control over the size of the main switch.

Please contact us if further clarification is necessary.

**Timings**

We do not provide a specific time for Installation to be complete and power to be live on exhibitor's stands.

We will use the full build schedule to complete the installation, including test and inspect. However, if you do require completion earlier we will always try to accommodate this request however this can't always be guaranteed due to issues outside our control

**Booked Power**

Booked Power is only guaranteed during the show open period. If power is needed during build for whatever reason, you can order build up power as a separate supply.

Due to the nature of **Residual Circuit Devices** and **Miniature Circuit Breakers** fitted on both ours and venues installations we cannot guarantee continuity of supply.
