

Stuck between which lighting to choose?
This guide should help you

5FT LED LIGHT BATTEN

5ft light batten is usually fitted behind the fascia or on the shell ceiling grid if one is installed.

This choice of lighting is ideal for giving your stand general light.

Recommended quantity: 1 per 6 SQM of stand Space

LED LONGARM SPOTS

Long arms are installed on walling.

This choice of light is ideal if you have no fascia and grid on your stand and you want to highlight graphics on your walling.

Recommended quantity:: 1 per linear metre of wall space.

LED SPOTLIGHT- TRACK MOUNTED / TRACK INC 3 LED SPOTS

Track lighting is usually fitted behind the fascia or on the shell grid if one is installed. Behind the fascia is always better because you can take full advantage of the lamps beam

This choice of light is ideal for highlighting different areas of your stand.

The lights are mounted on a track and can slide along and can be rotated 360 degrees so the lighting beam is focused in the area you require.

These can be ordered individually "Led Spotlight - Track Mounted" or in a set "Track inc 3 LED Spotlights."

Recommended quantity: 1 per 3 SQM of stand Space.

LED FLOODS

LED Floods are ideal if you want to light up a larger area of your stand.

These can be base mounted on top of a high wall to shine out to an area or fixed on an arm to shine back on to a graphic.

This type of lighting is preferred if the wall is taller than the normal 2.4m shell scheme wall due the brightness of the LED.

Recommended quantity: 1 per 6 SQM of stand space to open an area or 1 per linear 2m of wall space.

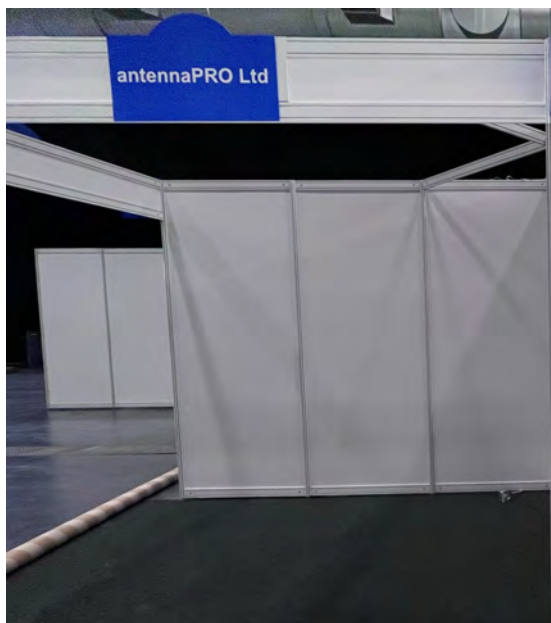

Do i need to order lighting for my stand?

Lighting should be an important part of your stand design and has the power to transform your exhibition stand.

By incorporating lighting into your stand, you will increase awareness compared to stands who choose not to.

Stand out from the crowd and introduce lighting to it!
